FOR IMMEDIATE RELEASE

Public Meeting for the Genesee County Central Corridors Study

Batavia, New York – The Town of Batavia, in partnership with the City of Batavia and Genesee County, will host a public meeting to review the findings and recommendations of the Genesee Central Corridors Study. The Study examined transportation needs along the primary state corridors in the heart of Batavia. The meeting will be held on Tuesday, March 22, 2011 at 7 p.m. at the Town of Batavia Town Hall.

The meeting will provide an overview of the existing and future traffic conditions within the study area and review recommended transportation strategies to manage Batavia's development over the next 20 years. Meeting participants will have an opportunity to review recommendations and concepts and provide their feedback.

The study area encompasses Routes 5&20, 33, 63 and 98 in the City and portions of the Town Batavia. These corridors have experienced significant change over the last decade, with more development expected in the future. The purpose of this study has been to better understand current and future conditions and identify where transportation enhancements should be made now and in the future.
