Re: **West Main Street Road Sanitary Sewer District - Obtaining Service**

Dear Resident:

In July, you received a letter from the Town of Batavia with an update on the status of the West Main Street Road Sanitary Sewer District project. At that time, the new sanitary sewer system required testing before customers could connect. We are please to inform you that the system is now fully operational. This letter is being sent out to assist residents in obtaining service.

How Do I Get Service?

The Town of Batavia must have an approved Water & Sewer Service Application before a connection can be made. A copy of the application is enclosed with this letter. Your plumber will complete the connection at the sewer cleanout following the Town of Batavia standards which have also been enclosed. For assistance through the application and installation process, please contact Mickey Morrow, Water and Sewer Supervisor, at 585-356-4900.

Please note that you aren't required to connect to the public sewer system, but if you choose to take advantage of this service, you must properly abandon your existing septic system. Contact the Genesee County Health Department at 585-344-2580 for further information.

Final Restoration Work Remains

Final restoration will re-commence in the spring of 2015. The final restoration work includes returning lawns, driveways, and pavement to their pre-existing condition. The temporary asphalt in the roads and paved/concrete driveways is removed, straight edges are cut and permanent pavement or concrete is then placed. Lawn areas are graded and seeded. If any area fails to grow properly, the Contractor is required to return to correct the problem. The homeowner is to water the new established grass as needed. If you have any issues concerning the restoration work, please contact the construction inspector, Dave Drexel at 585-455-1905.

The Town of Batavia is glad to have helped make public sewer available to you and welcomes you as our future customer. We will strive to provide you with the reliable service you expect.

Very truly yours,

Steven J. Mountain, P.E.
Town Engineer
